## Frequently Asked Questions

1. What types of websites do you develop?

We develop corporate websites, business websites, e-commerce stores, landing pages, portfolio websites, custom web applications, and enterprise portals tailored to your goals.

2. Will my website be mobile-friendly and SEO optimized?

Yes. Every website is responsive, SEO-ready, fast, and optimized for user experience.

3. Which technologies do you use?

Laravel, PHP, WordPress, HTML5, CSS3, JavaScript, MySQL, React, and API integrations.

4. How long does it take?

Business websites typically take 2-4 weeks, while custom web applications may take 6-12 weeks depending on complexity.

5. Why choose iSoft360 InfoTech?

We build secure, scalable, SEO-friendly websites focused on generating leads, improving user experience, and supporting long-term business growth.
